Southwire®

SOUTHWIRE REEL TRACKING SYSTEM

At Southwire, we understand our customers don't have time to waste trying to find reels for critical projects. This search time causes project costs to increase and valuable time to be consumed. SouthwireRTS is here to help!

REEL TRACKING SYSTEM BENEFITS

- Safeguard against theft or loss
- Save time searching/confirming arrival of reel and wire
- Help reduce project delays
- Safeguard against material shortages

- Improve inventory management
- Reduce scrap
- Capitalize the investment
- Optimize O&M spend

HOW IT WORKS

REEL TRACKING SUMMARY
- Provides procurement, specifications, product, and reel information
- Supports Query of Reels and multiple transactional entries
- Provides wire usage and age summaries

MAP LOCATION OF ALL REELS
- Spatially displays all queried reel locations and movement
- Drill down to detailed reel and wire information
- Map and satellite views available on smartphone

PULL DETAIL BY REEL
- Line-item detail of pulls by footage data including by whom and when the transaction occurred
- Simple entry of pulls supported by smartphone
- Alerts when reel is approaching return or age levels
- Supports reel pickup entry with weight estimates

REEL TRACKING SYSTEM ANALYTICS
- Provides reporting from cradle to grave of the reel's activity
- Information is automatically updated through Southwire's integration
- Ability to customize dashboards

WE DELIVER POWER... RESPONSIBLY.®
