Tag Line

Construction

The Tag Line is a polyester rope made of an inner core of parallel yarns that is covered by a braided jacket. The rope has high strength with very low elongation.

Features

- Torque and twist resistant
- Low elongation
- Kink resistant
- Long life in construction environments
- Pre-cut to appropriate lengths
- Available from Southwire with deposit

Application

The Tie Line is pre-cut and end prepared in 30 foot lengths to be used for the installation of Covered Aerial MV systems. The rope is attached between the Roll-by Blocks to facilitate conductor pulling, spacing and sagging.

Messenger Trolley or Pulling Trolley

Construction

The Messenger Trolley is an assembly of a cast aluminum alloy frame and machined aluminum rollers.

Features

- Designed for use with Roll-by Block to travel on messenger with pull rope
- Counterweighted to prevent jumping off of messenger

Application

The Messenger Trolley is used at the beginning of a pull to attach the pull rope and is followed by the first Tag Line that begins the attachment of the Roll-by Blocks. It rides along the messenger during the pull.
