

Re³™ MINIMUM BENDING RADIUS DEVICE FOR THHN/THWN-2 CABLES

The Re³™ Minimum Bending Radius (MBR) Device is uniquely designed by CableTechSupport™ Services Engineers to simplify installation and prevent overbending.

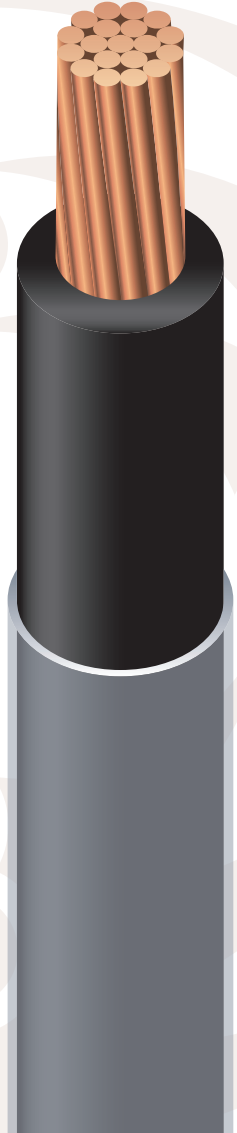

BENEFITS:

- No need to calculate Minimum Bending Radius (MBR) on the jobsite or search for value on spec sheet
- This adjustable device can be used on a wide range of cable sizes
- The specific cable size is marked on the device to make installation easier
- Overbending prevention with patent pending ring to guide installation
- A durable design allows for repeated use
