

How to Look Up Inventory

We have put the power to look up if we have inventory in your hands! In moments, you will know if a product is in stock or not.

1. Go to Inventory on the left side of the screen and click it to open a page like the below.

2. Using either the Southwire or Customer material number, enter the number and quantity and press Search. The Customer Hub will either display In Stock or Call Sales Rep to indicate Southwire's inventory levels.

3. A way to search multiple items at once is to upload a .csv file with Material numbers. A template is provided for you as a download option.

Inventory

All stock is subject to prior sale. Confirm stock on all non-standard packages with your sales representative.
