Southwire®

WE DELIVER POWER...RESPONSIBLY

A Vision of Generational SUSTAINABILITY

EFFICIENCY//INNOVATION//SUSTAINABILITY//AGILITY

STRONG. SUSTAINABLE. SOUTHWIRE.

Southwire began with a vision to help bring electric light to rural Georgia. Decades later, we are sparking new possibilities for people, businesses and communities all over the world. As we continue to grow and evolve, our 5 core tenets position us for generational sustainability by bringing social and environmental responsibility to the forefront of what we do.

GROWING GREEN
Reducing environmental impact across our operations and product lifecycle.

LIVING WELL
Prioritizing safe, healthy, and inclusive workplaces.

GIVING BACK
Strengthening communities through responsible stewardship.

DOING RIGHT
Acting with integrity and accountability.

BUILDING WORTH
Creating long-term value for customers, suppliers, and other stakeholders.

DRIVING PROGRESS WITH SCIENCE-BASED EMISSIONS REDUCTION TARGETS

Today we are committed to reducing carbon emissions across our operations and value chain in alignment with the Science Based Targets initiative (SBTi), advancing low-carbon manufacturing and transparent climate leadership. By 2032, we aim to achieve a 55% reduction in Scope 1 and 2 emissions and a 30% reduction in Scope 3 emissions.

SCIENCE BASED TARGETS
DRIVING AMBITIOUS CORPORATE CLIMATE ACTION

INDUSTRY-LEADING TRANSPARENCY WITH ENVIRONMENTAL PRODUCT DECLARATIONS (EPDS)

Over 100 Southwire products have independently verified EPDs, representing over 55 key product categories.

EPDs provide:
- Verified environmental impact data
- LEED, BREEAM, and green-building pathway support
- Lifecycle transparency to meet customer and regulatory expectations

RESPONSIBLE SOURCING: THE COPPER MARK

THE COPPER MARK®

Seven Southwire manufacturing facilities have been awarded The Copper Mark. Achieving The Copper Mark demonstrates the highest standard of responsible production in the copper industry, a commitment to continuous improvement, and contribution toward the UN Sustainable Development Goals.

REDUCING EMBODIED CARBON IN DATA CENTER PROJECTS

Southwire invests in renewable energy across our manufacturing operations to significantly lower the embodied carbon of our wire and cable products, empowering data center owners and operators to meet aggressive sustainability goals.

- Renewable energy investments directly reduce customers' Scope 3 emissions.
- Lower embodied carbon in our products translates into measurable reductions in the carbon footprint of data center builds.

WE QUANTIFY AND REDUCE YOUR BOM CARBON FOOTPRINT

Thanks to our third-party vetted process, we partner with data center customers to calculate the carbon footprint of their full wire and cable bill of materials (BOM), providing insights that go beyond what is visible in a standard EPD. For most projects, we are able to demonstrate embodied carbon reductions of more than 25% from our standard BOM.

CO_2 **25%+** in Carbon Reductions
