

CABLETECHSUPPORT™ Re³™ CABLE PULL CALCULATOR

SCAN TO ACCESS

Plan for efficient, reliable cable pulls!

Introducing the industry's intuitive digital cable pull calculator, an innovative tool that links to all wire and cable specification data to ensure the most accurate calculations. Determine conduit size, fill percentage, pulling tensions, cable sidewall pressure, and jam probability using the latest version of CableTechSupport™ Re³™ Cable Pull Calculator, now enhanced with smart cable selection, an intuitive jam-probability factor chart, and a more user-friendly cable pull report.

Engineered for precision. Built for every industry.
Designed to digitally transform your next cable pull.

TOP BENEFITS

New user-friendly interface for accessibility and ease of use

Two simple steps to access and start calculating

Gain access to Southwire's Engineering Spec Library for residential, commercial, industrial and utility products

INPUTS

- Select a Southwire cable by entering a 6-digit part number
- Determine pulling attributes
- Add unique pull segments
- Create a custom cable by adding some attributes
- Select cable type and other attributes

OUTPUTS

- Automatic warnings on maximum pull tension and jam probability to prevent cable damage
- No limit on the maximum number of pulling segments
- Reverse pulling modeling
- Enhanced 2D Sketch View
- Detailed, user friendly cable pull report
- Jam probability factor chart
- Print out a pdf report
