

American Mustang[®] SAFEGUARD[™] Type S00W Cord

Southwire's anti-microbial cable solution

The American Mustang[®] SAFEGUARD[™] Type S00W Flexible Cords are designed for extra hard usage on industrial equipment and heavy tools in the food and beverage industry while protecting the workforce and end consumers from pathogens and providing maximum uptime for manufacturing applications. This cord features a tested anti-microbial insulation resistant to 99.9% of bacteria, making it ideal for food and beverage, manufacturing spaces, healthcare, and other applications where anti-microbial properties are required.

FEATURES

- Resistant to 99.9% of bacteria
- American Mustang[®] flexible cord
- Silicone free
- Heat, moisture, and oil resistant CPE jacket with added anti-microbial compound
- Verified by UL Solutions to exceed Ecolab PM-40-1 material resistance test with 30-day exposure.

SUPPORTING THE FOOD SAFETY MODERNIZATION ACT

In support of the advancements in the food and beverage industry and the FDA Food Safety Modernization Act of 2011 (FSMA) which requires food producers to prevent food-borne illnesses and pathogens, Southwire has developed an anti-microbial insulation that is approved for use in Zone 2 and Zone 3 in food and beverage applications (food zone, splash zone, and non-food contact zone).
